

KEY FEATURES:

- ▶ Overload protection circuitry on HF driver
- ▶ Passive crossover
- ▶ Very wide coverage pattern
- ▶ Optimal in all room applications
- ▶ Synergy crossover design
- ▶ Screw type barrier strips

The CS-100S surround loudspeaker has been designed for medium to large sized applications. Utilizing our Synergy Horn™ technology, the CS-100S is a fully horn-loaded, coaxial surround, which allows the compact loudspeaker to offer big sound. Conventional designs have multiple sound sources (separate low frequency and high frequency devices), which result in multiple arrivals and interference. The CS-100S is a two-way passive system with built-in HF overload protection.

The CS-100S has a built-in 20 degree down angle and a wall bracket for seamless integration. Amplifier presets are available in the DNA series amplifiers and processors. EQ, crossover and multi-stage limiters are all dialed in to perfection.

Operating Frequency Range	-----	50 Hz - 24 kHz - 10 dB
Coverage	-----	110° conical
Output SPL	-----	120 dB SPL Continuous, 126 dB SPL Peak
Power:	-----	300 Watts Continuous, 1200 Watts Peak
Drivers	-----	8"/1" Coaxial
Input Connections	-----	Barrier Strip
Impedance	-----	8 Ohms
Weight	-----	45 lbs / 20 Kg
Dimension	-----	20.5" H x 20.5" W x 9" D
Notes	-----	Passive operation, built-in Sentinel HF Protection circuitry.
